

GEOSAT 2 International Price list

All prices are for ortho data. Non-ortho data can be provided on demand.

All prices are for licenses up to 5 single users. Uplifts apply for licenses for more than 5 users, and discounts are available for university and research licenses (see below).

L1 Product	Spatial Resolution	Bands	Archive	Standard Programming	Priority Programming
			Minimum: 25 km ²	Minimum: 100 km ²	Minimum: 100 km ²
Pan-sharpened	75 cm	4 (B,G,R,NIR) 3 (B,G,R) 3 (G,R,NIR)	7 \$/km ²	14 \$/km ²	26 \$/km ²
Bundle	75 cm Pan 3 m MS	P + 4 (B,G,R,NIR)	7 \$/km ²	14 \$/km ²	26 \$/km ²
Stereo-pair	75 cm Pan 3 m MS	P + 4 (B,G,R,NIR)	12 \$/km ²	24 \$/km ²	42 \$/km ²

Notes:

- Cloud cover for Programming Mode: < 15%. Uplifts apply for improved cloud coverage.
- Priority Programming assures that the image is acquired at the specified date. Such an acquisition has the maximum possible priority, and GEOSAT will never cancel an approved Priority acquisition.
- Standard/Priority Programming mode rates applies for orders received up to 24 hours before acquisition. If the time between order and acquisition is less than 24h, "24/7 Rush Tasking" rates apply.
- To qualify for Archive pricing, imagery must be at least 7 days old.
- All imagery orders must be at least 5 km in any direction.
- GEOSAT standard delivery timelines apply.
- GEOSAT standard cancellation policy applies.
- GEOSAT applies a 50% of discount for Research and development [Non-commercial] purposes on the Standard Programming.

L2 Product	Spectral Indexes	3 m	+ 3 \$/km ²
		Digital Elevation Model	3 m

L2 Products prices have to be added to imagery cost, whether Archive or Programming.

Available spectral indexes: NDVI, EVI, IPVI, GEMI, SAVI, MSAVI2, LAI, fPAR.

24/7 Rush Services	24/7 Rush Tasking	+ 1,200 \$/image
	24/7 Rush Download & Delivery (Programming)	+ 1,800 \$/image
	24/7 NRT Download & Delivery (Programming)	+ 3,600 \$/image
	24/7 Rush Delivery (Archive)	+ 1,200 \$/image

24/7 Rush Services prices have to be added to imagery cost, whether Archive or Programming.

24/7 Rush Tasking uplift applies when the time between order and requested acquisition is less than 24h.

24/7 Rush Download & Delivery (Programming) uplift applies when the requested time between image acquisition and delivery to the customer is less than 24h (and more than 3h).

24/7 Near-Real Time (NRT) Download & Delivery (Programming) uplift applies when the requested time between image acquisition and delivery to the customer is less than 3h.

24/7 Rush Delivery (Archive) uplift applies when the requested time between order and delivery to the customer is less than 24h.
