

QUALITY POLICY

GEOSAT's business purpose is to be a provider of Earth Observation products and services tailored to customer needs, customization of the portfolio to provide images, information and integration with customer operations.

To achieve these objectives GEOSAT has implemented a Quality Management System in compliance with the ISO 9001 standard and has adopted this Policy which represents the commitment of:

- To seek the Satisfaction of our customers, guaranteeing products and services without defects, of quality, in the time desired by them and at competitive prices, as a way to ensure the continuity and growth of the organization.
- The commitment of the Management in the Continuous Improvement of its activities, products and services and of the Quality System itself through data analysis.
- The commitment to comply with the requirements of our customers, with the legislation and regulations in force that are applicable, maintaining a conduct of permanent adaptation to them.
- Understanding of the needs and expectations of interested parties.

The Quality Management System is adequate to GEOSAT's purpose and is based on the knowledge and assessment of its processes.

This Policy is the reference framework to establish objectives, with which to continuously improve the quality of the services we provide and the effectiveness of the Quality Management System.

All GEOSAT employees are urged to support this policy and carry out their work in such a way that the improvement objectives that are established in accordance with it can be achieved.
